

SOMANATH NAYAK

B.Tech – Computer Science & Engineering

Email: somanathnayak455@gmail.com

Phone: +91-9337248172

CAREER OBJECTIVE

Motivated CSE student seeking roles in cybersecurity and software development. Skilled in Python, Flask, network security, and ethical hacking, with hands-on experience through internships and self-built projects.

EDUCATIONAL QUALIFICATIONS

Degree & Year	Institute	Board / University	Result
B.Tech (CSE) 2023–2027	Gandhi Institute of Excellent Technocrats (GIET), Bhubaneswar	BPUT, Rourkela	8.0
+2 Science (IT) 2021–2023	KBDAV Higher Secondary School, Nirkarpur	CHSE, Odisha	67.83
10th 2020–2021	Kalupadaghat Nodal High School	BSE, Odisha	71

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++

Cybersecurity: Network Security, Threat Analysis, Ethical Hacking, Kali Linux, Aircrack-ng, Nmap, Wireshark

Web Development: Flask, HTML, CSS, JavaScript, Github OAuth,

Databases: MySQL, SQLite

Tools & Frameworks: PyQt5, Edge-TTS, Git, Selenium

Operating Systems: Linux (Kali, Parrot OS, Ubuntu), Windows

CERTIFICATIONS & TRAINING

- Google Cybersecurity Certificate (6-month program) – Network Security, Threat Analysis, Risk Management | Google, 2024–Present
- Introduction to Cybersecurity Tools & Cyberattacks – IBM / Coursera
- Computer Networks and Network Security – Coursera
- Getting Started with Artificial Intelligence – IBM
- Python Training Program – Internshala, 2024–Present

INTERNSHIP EXPERIENCE

Python Developer Intern

Jun–Jul 2025

Web Buckets, Bhubaneswar

- Built Python web applications using Flask and core web technologies.
- Developed backend logic focused on application architecture and REST API design.
- Gained practical experience in full-stack web development and deployment.

AI / ML Intern

Sep–Oct 2024

InternPe, Bhubaneswar

- Assisted in building and testing machine learning models for classification tasks.
- Worked on data preprocessing and feature engineering pipelines.

- Gained exposure to model evaluation and deployment workflows.

POSITIONS OF RESPONSIBILITY

Python Trainer

Oct 2024–Present

Internshala

- Conducted Python training sessions for students covering syntax, data structures, and scripting.
- Created practical coding exercises and cybersecurity-oriented Python projects for learners.
- Helped students build confidence in programming through guided mentorship.

PROJECT DETAILS

Name of the Project	Jarvis AI Assistant
Tech Stack / Language	Python, PyQt5, Groq (LLaMA-3.3-70B), Cohere, Edge-TTS, HuggingFace, Claude API
Description	Built a personal AI voice assistant with a cyberpunk-themed PyQt5 GUI. Integrated multilingual speech recognition (English, Hindi, Odia) with auto-translation. Routed queries across Groq, Cohere, and Claude APIs with async automation, web search, and image generation support.

Name of the Project	Smart ERP System
Tech Stack / Language	Python, Flask, HTML, CSS, JavaScript, MySQL / SQLite
Description	Developed a web-based ERP system for managing student records, attendance, and academic data. Built REST APIs using Flask with role-based access control for admin and student roles. Designed a responsive dashboard with session management and structured database schema.

Name of the Project	Event Management System
Tech Stack / Language	HTML, CSS, JavaScript, Flask, MySQL
Description	Built a complete event management platform with event creation, registration, and booking flow. Implemented user authentication and role-based access for organizers and attendees. Managed backend with Flask and MySQL for event data, user records, and booking management.

Name of the Project	Kali Linux Cybersecurity Toolkit
Tech Stack / Language	Python, Kali Linux, Aircrack-ng, Nmap, Wireshark, subprocess
Description	Built a Python-based toolkit for network reconnaissance and vulnerability scanning on Kali Linux. Practiced WiFi security testing using Aircrack-ng with monitor mode and WPA handshake capture. Created CLI tools for port scanning with Nmap and traffic analysis with Wireshark.

Name of the Project	Cybersecurity Reconnaissance Toolkit
Tech Stack / Language	Python, Nmap, subprocess

Description	Built CLI automation scripts for network enumeration, port scanning, and structured result logging. Designed modular Python scripts integrating Nmap, whois, and netstat for network analysis. Applied cybersecurity fundamentals to automate reconnaissance tasks for ethical hacking practice.
-------------	--

ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

- Completed 6-month Google Cybersecurity Certificate – Network Security, Threat Analysis, and Risk Management (2024–Present).
- Completed Python Developer Internship at Web Buckets – practical Flask and web development experience (2025).
- Completed AI/ML Internship at InternPe – worked on ML model building and data pipelines (2024).
- Built Jarvis AI Assistant – integrated multiple LLM APIs with multilingual voice and full automation system.
- Served as Python Trainer at Internshala – conducted training sessions for students in Python programming.
- Hands-on ethical hacking experience with Kali Linux, Aircrack-ng, Nmap, and Wireshark.

SOFT SKILLS

Communication: Clear and confident communicator; conducted Python training sessions for students.

Problem Solving: Built AI assistant, cybersecurity tools, ERP and event management systems from scratch.

Leadership: Led team projects and mentored peers in programming and career development.

Teamwork: Collaborated in group college projects including full-stack platforms.

Time Management: Balancing internships, training responsibilities, and academic coursework simultaneously.

PERSONAL DETAILS

Date of Birth:	23 May 2005
Gender:	Male
Father's Name:	Dukhishyam Nayak
Address:	Kalakaleswar, Kalupara Ghat, Khordha, Odisha – 752022
Languages Known:	English, Hindi, Odia
Interests:	Cybersecurity, Ethical Hacking, AI/ML, Open-Source Projects

I hereby declare that the above information is true and correct to the best of my knowledge.

Place: Bhubaneswar, Odisha Date: _____ Signature: _____
